**Product Description**

The SATA M.2 ArmourDrive™ family consists of high-reliability, industrial solid state drives (SSDs) in a wide selection of capacities and endurance specifications. To better address customer needs, the 87 Series is available with 1-bit-per-cell (SLC), 2-bit-per-cell (MLC) or 3-bit-per-cell (TLC) 3D NAND configurations. ArmourDrive SSDs designed with Greenliant’s EnduroSLC™ Technology can reach ultra-high write endurance of 250K+ program/erase (P/E) cycles. Operating at extreme temperatures, SATA M.2 ArmourDrive is ideal for applications requiring removable data storage able to withstand the most demanding environments.

The 87 Series implements advanced NAND flash management technology to preserve data integrity and extend SSD lifespan. Built in the standard 2242 and 2280 form factors and backed by Greenliant’s technical support, SATA M.2 ArmourDrive gives industrial, computing, security, video and networking customers added flexibility when selecting reliable solid state storage for space-constrained, embedded systems.

**Key Features**

**Industrial SATA M.2 SSDs**
- 2242 (22mm x 42mm) and 2280 (22mm x 80mm), B+M key
- Supports SATA 6Gb/s, 3Gb/s and 1.5Gb/s
- Compliant with SATA Revision 3.2

**High Performance**
- Sequential Read / Write performance up to 550MB/s / 500MB/s
- Native Command Queuing up to 32 commands
- DRAM for better sustained performance (select PX Series SSDs)

**Energy Efficient**
- 3.3V low power supply
- Standby Mode less than 325mW
- Sleep Mode less than 180mW
- DevSleep Mode support

**Pre-programmed Firmware**
- Field-upgradable firmware to add new features and enhance device performance
- Configurable algorithms optimize data retention based on the usage model
- Embedded FFS enables seamless capacity upgrade with no change to host software

**Advanced Flash Management**
- Dynamic and static wear leveling algorithms maximize product lifespan
- Supports TRIM commands to remove invalid data which is no longer in use
- Replaces bad blocks with spare blocks in the NAND flash to prevent uncorrectable errors

**High Reliability**
- MTBF more than 2,000,000 hours

**Built-in ECC**
- Uses advanced bit error detection and correction optimized for 3D NAND

**SSD Lifespan Monitoring**
- Supports SMART command-based alerts indicating the remaining useful product life

**Power Interrupt Data Protection**
- Helps prevent data loss during power failures

**Data Security**
- Secure Erase for quick data wipe/factory reset
- AES-256 / TCG OPAL hardware encryption (select PX Series SSDs)

**Wide Range of Capacities**
- SLC (EX Series): 8 GB - 128 GB
- MLC (MX Series): 16 GB - 64 GB
- TLC (PX Series): 32 GB - 2 TB

**Applications**
- Industrial automation & control
- Base station equipment
- Digital signage
- Industrial PC
- Thin client
- Transportation system
- Test & measurement instrumentation
- Network server
- Gateway / Switch
- Banking terminal / ATM
- Security equipment
- Surveillance
- Data recorder
- Video conferencing
- Medical equipment
- Multi-function printer
