EnduroSLC™ Advantage

EnduroSLC™ SSDs offer a high reliability flash storage solution with ultra-robust data retention and ultra-high write endurance that exceeds capabilities of legacy, planar SLC NAND based products. Available in industry standard mSATA, M.2, CFast, 2.5”, U.2 and BGA form factors, Greenliant’s EX Series ArmourDrive™, NANDrive™ and Enterprise SSDs with EnduroSLC Technology are ideal for embedded and enterprise systems operating in extreme temperature environments and requiring ultra-high endurance at a lower cost per GByte.

In contrast to pseudo-SLC (pSLC) products that typically do not exceed 30K P/E cycles, EnduroSLC SSDs offer a minimum endurance of 50K followed by 100K and unparalleled 250K+ endurance options (ultra-high endurance of 300K and above is available upon request). NANDrive BGA SSDs with EnduroSLC Technology can withstand multiple passes of SMT high temperature process without losing data. System designers can take advantage of the variety of the most popular form factors supported by Greenliant’s EnduroSLC SSDs that will meet and exceed the needs of their mission critical applications.

EnduroSLC™ is a proprietary 3D NAND management technology developed by Greenliant for high reliability applications requiring superior data retention and endurance in extreme temperature, high stress environments. EnduroSLC enabled SSDs meet robust data retention requirements under complex temperature conditions and support high cross-temperature ranges between data programming and reading. With advanced hardware ECC capabilities and NAND flash management algorithms, EnduroSLC Technology significantly extends the write endurance of 1-bit-per-cell (SLC) SSDs reaching industry leading 250K+ program-erase (P/E) cycles.

Applications

- Industrial automation and control
- Telematics
- Data recorder
- Industrial gaming
- Transportation
- HMI panel
- Point-of-Sale terminal
- VoIP gateway
- Wireless base station
- Router / Switch
- Aerospace
- Industrial PC / Single-board computer
- Medical equipment
- Security system
- Test and measurement equipment
- Robotics

EnduroSLC™ Product Line:

- SLC-250
- SLC-100
- SLC-50
- MLC-5

EX Series endurance (P/E cycles) compared to MX Series with 3D MLC NAND
